

WHAT IS THE FDOMES FENCING SYSTEM?

The FDomes fencing system represents an innovative and comprehensive modular solution, crafted with aesthetics, functionality, and flexibility at its core. It transcends the conventional fence, serving as **a meticulously designed system that can be tailored to accommodate the evolving requirements of your space or brand identity.**

The system comprises **steel posts** (either galvanized or varnished) and **customizable fillings**. This allows you to achieve not only a robust and durable fence but also a means to enhance your brand's visibility.

Finishing elements are readily interchangeable; they can be repurposed for various projects or swiftly substituted with new options that align with your current requirements.

Various size options

Four post heights (0,8 m / 1,15 m / 1,45 m / 1,95 m) and two span widths (1 m / 2 m) facilitate precise system adjustments tailored to specific projects.

Extensive array of finishes

Choose the color of the fence mesh or opt for printing on both the mesh and the PVC fence. You determine the appearance of your fence.

Cutting-edge tension system

The filling tension system guarantees optimal material stretch, thereby preventing deformation under diverse weather conditions.

Three methods of anchoring

Depending on the substrate and its application, you may select:

- temporary ballast system - enabling rapid assembly and disassembly;
- steel foot for hardened surfaces - a reliable, robust, and enduring solution;
- ANKERD system - integrated directly into the ground, providing stability without the necessity of concrete.

Numerous possibilities in one

It serves not only to secure the property but also as an effective advertising medium. This solution allows for the integration of protective functions with the opportunity to promote your brand or service in a single location.

Compact and straightforward to assemble

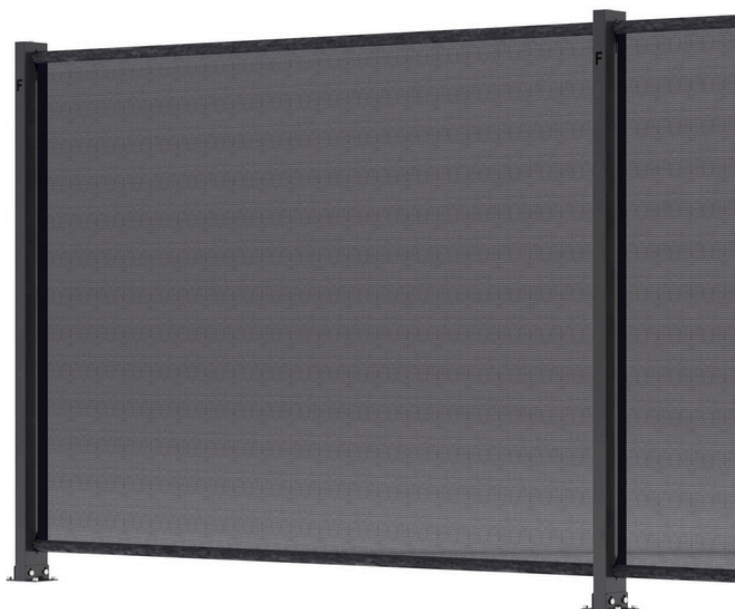

The system's innovative design allows for rapid assembly of the fence, while the storage and transportation of its components require minimal space.

WHO IS THE FDOMES FENCING SYSTEM FOR?

The FDomes system was designed to cater to a diverse array of users, including private property owners seeking an aesthetically pleasing finish, professionals requiring durable solutions, and event organizers for whom mobility and visual impact are paramount.

Fence section

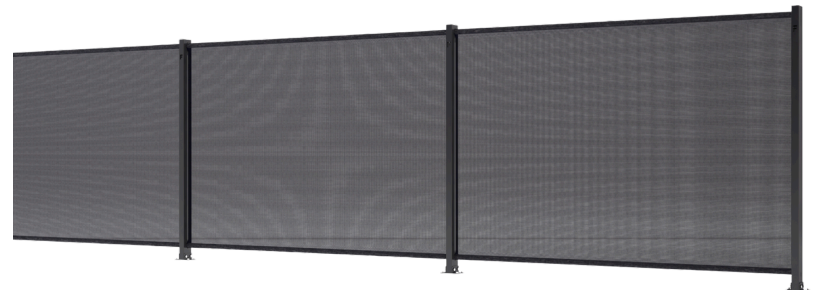

An outstanding option for construction firms, developers, property managers, security companies, and private properties alike. The system serves effectively as a robust and aesthetically pleasing fence for investment zones, construction sites, and land parcels.

Advertising section

The ideal solution for organizers of outdoor events, festivals, relaxation areas, trade fairs, promotional campaigns, and sports activities. The FDomes system facilitates the rapid designation of zones, ensuring both safety and aesthetic enhancement of the space, beginning with a single segment.

HOW CAN YOU UTILIZE FDOMES SYSTEM?

- development investments and construction
- modernization of infrastructure
- educational institutions and preschools
- athletic fields and recreational areas
- festivals

- outdoor displays
- athletic competitions
- beer gardens
- fan zones
- seasonal restaurants

- community gardens
- property enclosure
- farmsteads
- corporate headquarters
- parking areas / plazas

WHAT DISTINGUISHES US

Streamlined installation procedure

The system enables effortless customization of the fence to meet your spatial and aesthetic requirements.

Intuitive assembly and modular design

A system founded on a repeatable assembly process that facilitates rapid and stable assembly of any configuration, even by a single individual.

The finest quality materials

Since 2008, we have specialized in the production of steel components, providing durability and aesthetics of the highest caliber.

Assistance from experts

The FDomes consulting team will be pleased to create a customized fence configuration designed to meet your specific requirements.

Personalization and aesthetics

Select between contemporary mesh or a frontlit banner featuring your custom print. The innovative tensioning system ensures that the filling consistently appears flawless.

Expedited order fulfillment

Due to efficient production and the high availability of components, you can rely on short lead times.
